The Role of Computers in Management Information System

Pranita R. Ambulkar

Student of Master of Computer Management

Dr. Ambedkar Institute of Management Studies and Research, Deekshabhoomi, Nagpur, India

Abstract: *In virtually every business, a computer is an essential tool for running day-to-day operations, enhancing productivity, and communicating with customers, suppliers, and the public. Managers use computers for a variety of reasons, including keeping their teams on track, budgeting and planning projects, monitoring inventory, and preparing documents, proposals, and presentations. Managers need to understand not only the basic functions of the corporate software tools used in the office but also the Internet and other external computing tools that can improve the way manage their departments.*

Keywords: Role of Computers
