Abstract*: A digital application called a project management platform aids teams in planning and monitoring their projects, tasks, and resources. It has features like project planning, task delegation, tracking and reporting, and collaboration tools to make teamwork easier. Large-scale projects need effective management and technical assistance to be successful. Organizing and managing team projects online with a project management software creates a virtual meeting room for team members, project managers, and clients. It provides a selection of strong features and tools that are intended to make project planning, execution, and monitoring easier. Employing such a platform enables businesses to improve productivity, boost project success rates, and ultimately accomplish their objectives more quickly.*

Keywords: Task Assignment, tracking, Status update, Progress Bar, Communication and Collaborations
