Abstract: *The trending Technological development in the field of library and information science (LIS) is constantly changing with new trends and innovations. LIS professionals in keeping pace with the fast changing world are coming up with innovative methods to run the libraries efficiently.*

One of the latest trends in LIS is the adoption of digital technologies to manage right from library collections building and services, including the use of online reference services and digital archives. Technological like QR code for library collection development and resource promotion. LIS professionals are also becoming aware of plagiarism check software. Another important trend in LIS is the growing focus on data management, with libraries providing services such as data duration and analysis. User-centered services and personalized experiences are also becoming more prevalent in library services, and libraries are expanding their outreach efforts to engage with undeserved communities through social media and other platforms. These latest trends in LIS demonstrate the field's continued evolution in response to changing user needs and technological advancements. Technology will keep on advancing and new trends will keep on emerging. LIS professional are ready to welcome impending new trends. The paper discusses recent trends in Librarianship with various latest technological tools and their uses in Library and Information science.

Keywords: Collection Management, Electronic resources management, Augmented Reality, Digital Displays, Library Trends, QR Code, E-resources, Plagiarism.
