

Knowledge Management and its Application in the Libraries

Dr. Dilip Janaji Jadhav

Librarian

Anjuman-I-Islam's Institute of Hospitality Management, Mumbai, India

Abstract: *The management of information has long been regarded as the domain of librarians and libraries. Librarians and information professionals are trained to be experts in information searching, selecting, acquiring, organizing, preserving, repackaging, disseminating, and serving. However, professionals in information technology and systems have also regarded information management as their domain because of the recent advances in information technology and systems. Present paper is an attempt to study the different dimension of knowledge management and its application in library and information sciences.*

Keywords: Knowledge Management, information technology, intellectual capital, innovations.
