**Abstract:** *Commerce education is important to gain knowledge of business, trade, industry and commerce. It provides the knowledge for various specialized and professionalized study related to the business. In India commerce education is available after the school period because of this school students were not taught commerce subjects and they don't possess any business and finance knowledge. There are various courses available to commerce students which help them to gain knowledge and competencies required for job in industries. But the students were not possess proper knowledge and competencies due to lack of faculties and practical training provided by colleges and institution which lacks students to get job. In present scenario everything is digitalized which also applies to education. Modern education also adopted the online education and MOOCs platform to achieve the objectives of commerce education.*

**Keywords:** commerce education, opportunities, challenges, online education, faculties
