Abstract: *Right to Information (RTI) is the privilege of each citizen in India. Understudy is likewise a native of India. As relevance of RTI is huge, so the object of the paper is limited to understudies with the goal that understudies could pick up their entitled data and secure informations in instructive foundations of their decision. For each Indian native appropriate to information is the essential thing right that individuals appreciate. Here it will be a dialog on the privileges of the information. In India, information is a vital part and it helps in taking the accurate choices in the correct time. Information is a crucial right of the general population which they appreciate at each progression. Disavowal of information to any individual is a grave unfortunate behavior by the official courtroom. Every single understudy has the option to think about the working of each open expert that is colleges and other instructive establishments.This paper used both primary and secondary information which are collected from the general public through the simple random sampling method. The research paper is done in both doctrinal and non-doctrinal method. The questions related to the was also taken into account. The survey was limited to samples because of the time constraint. The number of samples taken are . The primary sources of information are taken from the books and statutes and the secondary sources of information are taken from the articles of the journals, working papers, thesis and presentation papers. The analysis of the survey is done by using chi-square.*
