Abstract*: Orphanage is a residence for people who are without parental support or any moral support from anyone. Such orphans required help from people who are in good financial state to donate them. Generally, in orphanage records are usually maintained for future reference, retrieval, and easy management. The objective of this paper is to help the orphan from different orphanage to get help from the donors who wish to donate the them by using our web application. The proposed system helps the staff in reducing paper work and enhances tidiness in records keeping since the existing one uses manual keeping. The system allows the orphanage owner to add and modify the orphan records. The system provides suggestions for assignment of otheserphans to the caretakers/donors*

Keywords: Digitization, Management system, Information system
