Abstract: *A healthcare appointment manager is like a digital organizer for scheduling and managing appointments between healthcare seekers and healthcare providers. It includes features like scheduling appointments, sending reminders, storing patient information securely, and facilitating communication between healthcare seekers and providers. It also generates reports to help track appointments and improve efficiency. The system ensures data protection and secrecy by complying with medicare rules and using encryption to safeguard healthcare seekers data. It can It can combine with other medicare rules for seamless information exchange and supports online payments and insurance verification*
