**Abstract:** The Convolvulaceae family, commonly known as the morning glory family, is widely distributed across tropical, subtropical, and temperate regions. This family primarily consists of twining herbs or shrubs, occasionally exhibiting milky sap, and comprises approximately 60 genera and nearly 1,600 species worldwide. The present study aims to review Ipomoea triloba L., an ethnomedicinally significant plant within this family. This review focuses on documenting the phytochemical studies conducted on Ipomoea triloba L.

Keywords: Ipomoea triloba, Convolvulaceae and Ethnomedicinal
