Abstract: • *Online social networks are increasingly influencing how individuals interact with each other by exchanging their private and professional data.*

• *The social network is currently a common way to communicate with others that are spread across a variety of locations around the globe. When we speak about social networking then we can say that by sending them a request or readily sharing data with each other, anyone can readily make friends.*

• *An individual user can have numerous accounts at various social networking locations to maintain in contact with their colleagues.*

• *The project sheds light on the role of fake identities in sophisticated constant threats and includes the above approaches to identifying fake social media accounts..*

Keywords: social networks
