Abstract: *The National Education Policy (NEP) 2020 envisions a transformative shift in India's education system, promoting flexibility, inclusivity, and holistic learning. The policy emphasizes the development of cognitive, social, and emotional skills beyond rote memorization, fostering critical thinking and creativity. Early Childhood Care and Education (ECCE) focuses on foundational literacy and numeracy, while a multidisciplinary approach allows students to choose subjects based on interest. Structural reforms aim to enhance accessibility, equity, and quality in education. NEP integrates vocational training within the school curriculum, ensuring students are workforce-ready. Teacher training and professional development are prioritized, emphasizing pedagogical advancements. Digital learning platforms, competency-based assessments, and multilingual education ensure inclusivity and improved learning outcomes. Higher education is restructured with flexible exit options and interdisciplinary learning to broaden opportunities.*

Technology integration plays a crucial role in modernizing education, expanding access through digital platforms like Swayam and Diksha, and enabling personalized learning. Virtual classrooms and e-resources support educators' professional development. Digital literacy is a core focus, ensuring students are equipped for the digital economy.

Language and cultural inclusivity are key aspects of NEP 2020. It promotes education in regional languages until Grade 5, fostering linguistic diversity and cognitive benefits. Indigenous knowledge systems, local literature, and cultural representation in curricula strengthen India's heritage awareness.

The overall impact of NEP 2020 is profound, improving learning outcomes, bridging skill gaps, and preparing students for global challenges. With competency-based evaluations replacing rote learning, an emphasis on critical thinking and interdisciplinary education enhances academic quality. By prioritizing equity, teacher empowerment, and skill-based learning, NEP 2020 sets the foundation for a future-ready, inclusive education system aligned with international standards..
