Abstract: *So, this paper is about something called "Learn Bridge - Senior-Junior Connector." Basically, it's made for college students to get help from seniors. The whole point is to have a place where juniors can ask whatever questions they have about their subjects, and the seniors who already went through that stuff can reply and give their own tips and simple advice. There's cool stuff on the platform: you can just chat live, jump into a group forum, join mentorship sessions, or even earn points that make it more fun to use. All these things help you clear your doubts quicker, learn stuff faster, and also make friends in college. Seniors get to work on their own skills, like explaining things and being a leader. In the end, Learn Bridge just wants college to be a place where everyone's friendly and helpful and it's easy to learn and grow together.*

Keywords: Learn Bridge, Senior-Junior Connector, college students, peer mentorship, academic support, live chat, discussion forums, mentorship sessions, points system, leadership skills, doubt solving, student community, friendly learning, growth together
