Abstract: *A blog is a website of discussion or information posted on the World Wide Web (WWW) that consists of individual, often informal, diary-style text entries. Messages are usually displayed in reverse chronological order, with the most recent message at the top of the web page first. Until 2009, blogs were usually the work of one person, sometimes a small group, and often covered a single topic or topic. The 2010s saw the emergence of "Multi-Author Blogs" (MABs), written by multiple authors and sometimes professionally edited. MABs in newspapers, other media outlets, universities, think tanks, advocacy groups and similar organizations account for the increasing volume of blog traffic. The growing popularity of Twitter and other microblogging systems has helped incorporate MAB and single-author blogs into the media. Blog can also be used as a verb meaning to add or maintain content to a blog.*

Keywords: Blog, World Wide Web (WWW), Multi-Author Blogs (MABs), User Interface (UI)
