Automated Resume Builder for Fresh - Graduates Using Html and JavaScript

Mr Sudarsanam[1], Ajith J[2], Annamalai J[3], Darrel P[4]
SRM Valliammai Engineering College, Kattankulathur, Kanchipuram, Tamil Nadu

Abstract: *This project is an online resume builder. It is an application that simplifies the task of creating a resume for individuals. The program is based on web development using Html,CSS,JS and BootStrap. The system is developed to provide an easy means for creating a professional looking resume. The system is flexible to be used and reduces the need of thinking and designing an appropriate resume according to qualifications. Individuals just have to fill up a form that specifies questions from all required fields such as personal questions, educational, qualities, interest, skills and so on. The answers provided by the users are stored and the system automatically generates a well-structured resume. Creating a resume is a bit of a tedious task for any working professional from any industry. One has to keep it short, simple, and with the latest work experience, and constantly update it over a while. Individuals just have to fill up a form that specifies questions from all required fields such as personal questions, educational, qualities, interest, skills and so on. The answers provided by the users are stored and the system automatically generates a well-structured resume.*

Keywords: Resume Builder, Resume, Fresh- Graduates, HTML, Professional Resume, Javascript ,Resume Generator.
