Flexural Strengthening of Light Weight Reinforced Concrete Beams by Using Glass Fiber Reinforced Polymer

Ms. Mousami M. Shinde[1], Mr. S. M. Kolekar[2], Mr. A. B. Sawant[3]
PG Student, Department of Civil Engineering, KITCoE, Kolhapur, India[1]
Assistant Professor, Department of Civil Engineering, KITCoE, Kolhapur, India[2, 3]

Abstract: *The use of Lightweight concretes has gained acceptance and popularity worldwide in the recent years in the construction and development of both the infrastructure and residential buildings. Light weight aggregate concrete has become more popular in recent advancements owing to the tremendous advantages it offers over the conventional concrete but at the same time light in weight and strong enough to be used for structural purposes. Replacement of natural aggregate with concrete such as light weight concrete by using sintered fly ash aggregate (natural aggregate), The main disadvantage of conventional concrete it is high self -weight. This heavy self-weight will make it to some extent an uneconomical structural material. Light weight concrete having low density facilitates reduction of dead load and to increase thermal insulation.*

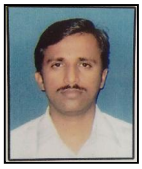
BIOGRAPHY

Ms. Mousami Shinde completed her Bachelor Degree in 2016 from KIT College of Engineering, Kolhapur. She is pursuing her M. Tech Civil and Structural Engineering from the same institute. Her area of interest is Concrete Technology and RCC Structural Design. She has an industrial experience of 4 years.



Mr. S. M. Kolekar is working as an Assistant Professor in KIT College of Engineering (Autonomous), Kolhapur. He is pursuing PhD from VTU, Belgaum. His areas of interests are Concrete Technology and Structural Analysis. He published 7 international journal papers. His total teaching experiences 20 year.

Mr. A. B. Sawant is working as an Assistant Professor in KIT College of Engineering (Autonomous), Kolhapur. Completed masters in Civil Construction and Management from Government College of Engineering, Karad. His areas of interests are Concrete Technology and Construction Management. Received grant for Research Project under Research Initiation Scheme by Shivaji University, Kolhapur. He published 32 international journal papers and attended 10 National and International Conferences. His total teaching experiences 20 year.
