Abstract: *The main objective of the Vehicle Parking Management System is to manage the details of duration, vehicles, parking slots, customers, parking fees. It manages all the information about duration, type of vehicle, owner information and all other related information about the parked vehicle. The project is totally built at administrative end that is only administrator is given the access to update and edit the information. The purpose of the project is to build an application program to reduce the manual work for managing the parking slot and its fees calculation. It tracks all the details and stores it in the database.*

Keywords: Vehicle parking, Billing, Visual studio, PHP.
