Kamla Nehru Mahavidyalaya, Nagpur, Maharashtra, India[1]

Director, Institute of Cooperative Management, (Ministry of Cooperation Govt. of India), Hyderabad[2]

Abstract: *D2M technology is a tool for sending the large content like FM radio. D2M can be used for rural education and training without internet connectivity. It is very economical in usage but requires mobile phone at the hands of the user. D2M technology is a mass media but not panacea to formal or online education and training. It helps to send content across the country in a single stroke.*

Keywords: D2M technology
