Abstract: Herbal cosmetics are the beauty products, which possess desirable physiological properties like Skin healing, smoothening, appearance, enhancing and conditioning properties due to the herbal ingredients. Cosmetics are safe, effective, elegant properties. Whatever may be the type of skin, these three steps act as External care for skin to protect it from the constant effect of environment, stress and skin's natural process of cell degradation decay. Flaxseed oil cream is used for heal cracked fingertips during winter; whenever You apply cream to your face, hand, leg, cover the cracked area with a nice thick layer too, to seal in moisture and protect the area.

Keywords: Flex seed oil cream cosmetic, formulation, herbal products
