**Abstract:** *Working women want to be financially independent & secure. They want to invest their money & savings to handle critical situations at any stage of their lives. This research study is based on the analysis of income and investment behaviour of the working women in India. The study was conducted on working women in both government and private sectors in India. The data has been analysed using frequency analysis, descriptive statistics, percentage and person correlation coefficient analysis with the help of statistical software.*

**Keywords:** Working Women, Income, Investment Behaviour, Statistical Software
