Abstract: *Computer Science (CS) has altered many facets of our life, most notably by making it simple to obtain digital payments. During the Monetization phase, the Government of India obliged citizens to undertake all commercial activity in digital manner, either directly or indirectly. Ordinary people began to transition from old payment methods to digital payment systems that provided safety, security, and convenience of use. Because of the quick advancement of technology in smart phones and cheap internet access, the Indian market has embraced Digital Payments. The percentage of digital payments made through alternatives is rapidly increasing. The current study's goal is to determine the various forms of digital payment systems utilised by regular people in their daily lives.*

Keywords: Digital, Payments, Demonetization, Digital Revolution
