Abstract: *Virtual clinics are a new form of healthcare delivery that has emerged due to technological advancements. These clinics provide access to healthcare services remotely, enabling patients to receive medical care without having to visit a physical facility. This paper explores the concept of virtual clinics, including their history, benefits, challenges, and the technologies that support them. We also discuss the impact of virtual clinics on healthcare delivery, patient outcomes, and healthcare professionals.*

Keywords: Virtual clinics, healthcare delivery, technological advancements, remote access, medical care
