Abstract: *This paper examines the dynamic and complex evolution of economic ties and trade relations between India and China in the post-Soviet era. The dissolution of the Soviet Union marked a significant turning point in global geopolitics, creating new opportunities and challenges for emerging economies like India and China. Through a comprehensive analysis of historical developments, policy frameworks, and economic indicators, this paper aims to unravel the multifaceted nature of their economic engagement. The study explores key factors influencing bilateral trade, investment patterns, and the impact of geopolitical dynamics on economic cooperation. Additionally, it assesses the role of regional and global institutions in shaping the trajectory of India-China economic relations*

Keywords: Economic Ties
